

How to make \$12K–\$36K a year reselling on eBay (done properly)

What it takes: about 52–155 good flips a month, done the way eBay allows. Here's exactly how, with the real math.

1 How reselling works

2 The math on one sale

A quick flip		A smart flip	
You buy it for	\$20.00	You buy it for	\$10.00
It sells for (free shipping)	\$40.00	It sells for (free shipping)	\$45.00
eBay fees	–\$5.84	eBay fees	–\$6.52
Shipping + packing	–\$9.00	Shipping + packing	–\$9.00
You keep	\$5.16	You keep	\$19.48

eBay.ca fees for most categories without a Store: 13.6% of the total sale + \$0.40 per order (orders over \$10). Shipping and packing estimated at \$9 for a small parcel.

3 What \$12K–\$36K a year takes

\$12,000 A YEAR	\$36,000 A YEAR
52 flips a month (about 2 a day) at \$19.48 profit per smart flip	155 flips a month (about 5 a day) at \$19.48 profit per smart flip

The secret is margin. With \$5.16 quick flips, the same goals take 194–582 sales a month. Find items you can buy low and sell high, and you need about 4x fewer sales.

Good to know: do it the way eBay allows

- ✓ **Retail arbitrage:** buy the item first, then list it and ship it yourself. (This guide.)
- ✓ **Wholesale drop shipping:** a real supplier ships for you under a signed agreement.
- ✗ **Not allowed:** ordering from Amazon or Walmart after a sale and having them ship to your buyer (eBay drop shipping policy).

4 Your first week

- Day 1** Open an eBay seller account. Use the **Sold items** filter to research 20 things you see in thrift and clearance aisles.
- Day 2–3** Visit 2–3 stores. Buy only items that sell for 2x your cost after fees. Start with \$100–\$200.
- Day 4** Photograph each item on a plain background. Titles: brand, model, size, condition.
- Day 5** List 10 items, priced against recent sold listings. Offer tracked shipping.
- Day 6–7** Ship the day it sells. Track every dollar: buy price, sale price, fees, shipping, profit.
